Definition: Order continuity

Let X be a Banach function space. We say that $f \in X$ is an order continuous element if

$$\|f\chi_{A_n}\|_X\to 0$$

for any sequence (A_n) satisfying $A_n \downarrow \emptyset$, that is, $\chi_{A_n} \downarrow 0$ as $n \to \infty$.

Definition: Order continuity

Let X be a Banach function space. We say that $f \in X$ is an order continuous element if

$$\|f\chi_{A_n}\|_X\to 0$$

for any sequence (A_n) satisfying $A_n \downarrow \emptyset$, that is, $\chi_{A_n} \downarrow 0$ as $n \to \infty$. By X_o we denote the subspace of all order continuous elements of X.
