

THURSDAY

room 0/27

(chair: Imrich)	
09:15-10:00	Distinguishing graph vertices by coloring the edges - palettes, automorphisms, local irregularity Mariusz Woźniak
10:05-10:25	Efficient checking of diagram commutativity Richard Hammack
10:30-11:00 coffee break	
(chair: Dravec)	
11:00-11:45	Q-ary generalizations of set intersection and extremal graph theoretic problems Balázs Patkós

room 0/103 (chair: Dravec)		room 0/100 (chair: Ž. Pleteršek)	
11:55-12:15	List covering of regular multigraphs Jan Bok	11:55-12:15	Approximating energy of wine glass cycles and paths Dragan Stevanović
12:20-12:40	Graphs with a unique maximum independent set up to automorphisms Elżbieta Kleszcz	12:20-12:40	On emulational equivalence of combinatorial games and the game Hackenforb Danijela Popović

12:45-14:00 lunch break	
----------------------------	--

room 0/103 (chair: Kelenc)		room 0/100 (chair: Vesel)	
14:00-14:20	Hamiltonicity and matchings in quartic graphs... the case of accordion graphs John Baptist Gauci	14:00-14:20	Min orderings and list homomorphism dichotomies for signed graphs Nikola Jedličková
14:25-14:45		14:25-14:45	Computing and storing M-polynomials of (planar) graphs Domen Romih

room 0/27 (chair: Pilšniak)	
14:55-15:00 Introduction	
15:00-15:45	Pointwise vs. setwise stabilizers László Babai
15:50-16:30 coffee break	
16:30-16:50	On distance and strong metric dimension of modular product Iztok Peterin
16:55-17:15	On some metric properties of direct-co-direct product Aleksander Kelenc
17:20-17:40	The language of self-avoiding walks Christian Lindorfer
17:45-18:05	Special lattices of orthogonal projectors Lorenzo Sauras-Altuzarra
18:10... Sparkling finale	

WiFied lunch session
